

Requirements concerning the three-month internships abroad

On return, PhD Students are obliged to submit to the Project Coordinator and the Head of the POWER PhD Studies the following documents:

- 1) a certificate of stay issued by the host university/institution and signed by the co-supervisor (in English)
- 2) a report of stay (in English; signed by the supervisor, the co-supervisor or the respective tutor/researcher from the host university/institution as well as by the PhD student)
- 3) documents relevant to the financial settlement of the internship (a contact with the Laboratory of National and Foreign Projects is advised before leaving for the internship)

The report should include a detailed description of all the scholarly activities related to the PhD project.

Obligatory components:

1. at least 30 hours per week of the PhD Student's own work pertaining to the preparation of the PhD project
2. at least 6 hours per month of consultations concerning the PhD project with the co-supervisor/ tutor/research team member from the host university/institution

Components dependant on the type of the research project pertaining to the PhD project:

3. a detailed report of research work (including the number of hours dedicated to lab research and the number of experiment participants, etc.)
4. a detailed report of the collected publications related to the PhD project (library query) justified by passages from the chapters of the doctoral dissertation/papers prepared for publication including references to the collected publications
5. a detailed report of relevant data collected during the internship
6. a detailed report of data analysis
7. a detailed report of the PhD project-related publications in preparation or in press as a result of the internship

8. a detailed report of the fragments of the doctoral dissertation prepared during the internship
9. participation in various scholarly activities at the host university/institution, e.g., workshops, department/research team meetings, guest lectures, lectures
10. other types of scholarly activities pertaining to the PhD project not listed above
